

We are looking for a

## Fuel Cells - Process Engineer (m/w/d)

In the division:

- Research & Technology

Greenerity is a young company in the Industriepark Wolfgang (Hanau), that is active in the research, development, production and sales of key components for PEM fuel cells and PEM electrolysis.

**A new site located in Alzenau (Bayern) is currently under construction.**

Our owner, the Toray Group, is an international group of companies with core competences in the fields of textile fabrics, carbon fibers and high tech polymers. Greenerity's focus is the membrane-electrode-assembly (MEA), which enables the electrochemical conversion of hydrogen and oxygen to electricity and water through catalytic processes.

Please send your application via e-mail to [bewerbung-RT@greenerity.com](mailto:bewerbung-RT@greenerity.com)  
Code number: 2021-0009

**Greenerity GmbH**  
Human Resources  
Industriegebiet Süd E11  
63755 Alzenau

### Main Tasks

- You will take on machine projects from first specification, proof of processes and commissioning of first of its kind production machines
- Definition and setup of manufacturing processes and workflows in the context of the acquisition of new production machines
- Develop new processes for Dispersion, Electrode coating, CCM and MEA manufacturing
- Research for new process/machine solutions and Planning and execution of process trials
- Work with suppliers of production machinery (German & English)
- Align process and machine functions and criteria with internal and external customers, i.e. customers, operation, quality assurance and management

### Your Profile

- University degree in process engineering with at least 3 years experience in similar fields such as
  - coating, lamination, de-lamination
  - web / roll-to-roll processes, web handling,
  - converting processes and stacking
  - pick and place/roll to piece e.g.
  - battery, fuel cell, packaging or printing industry
- Interest in new technologies and Innovation and be inventive
- Fluent in English
- Self-reliant and motivated work ethic and commitment to your task
- Team player and ability to maintain a high standard

### Our Offer

- Interesting and challenging tasks in a growing market of renewable energy
- Innovative & exciting task in the field of process engineering
- Plan, check, improve - know the entire process up to full automation
- International working environment and interaction with Japan
- Function and performance-oriented compensation system
